

Have you had your CCV filter changed lately?

When you change your Crank Case Ventilation Filter, you're not only keeping your engine intake system cleaner, but you're also preventing your turbo, EGR and DPR filter from prematurely failing. Your maintenance cost in the long run will be reduced, fuel efficiency increased, and all while doing your part in protecting the environment by reducing harmful pollutants into the atmosphere.

Bring your Hino truck into an authorized Hino dealership and have your CCV filter changed today!
