ELECTRONIC STABILITY CONTROL

Automatically intervenes when there is a high risk of directional instability that could lead to loss of vehicle control or rollover.

COLLISION MITIGATION SYSTEM*

Available radar-based collision mitigation system provides active braking on moving and stationary vehicles – in all visibility conditions.

LANE DEPARTURE WARNING**

An available camera-based system that helps reduce road run-offs, side swipes, and head-on collisions due to driver inattention or fatigue through distinct audible warnings for unintentional lane departures.

[ACTIVE] SAFETY FIRST.

Safety starts before you turn on the engine. The Hino XL Series cab has been designed for safe, easy entry and exit with exterior grab handles (optional), deep all-weather grip steps and extra wide door openings. Standard LED headlights, a high seating position and a 2,385 sq. in. windshield provide maximum visibility for the driver. Advanced active safety systems are also available on all models.
